-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 3/7/03 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid the abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

THE PERIOD FOR REPLY [check only a) or b)]

- a) ☒ The period for reply expires 5 months from the mailing date of the final rejection.
- b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. ☐ A Notice of Appeal was filed on \_\_\_\_\_. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2. ☐ The proposed amendment(s) will not be entered because:
- (a) ☐ they raise new issues that would require further consideration and/or search (see NOTE below);
- (b) ☐ they raise the issue of new matter (see NOTE below);
- (c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
- (d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: \_\_\_\_\_

3. ☒ Applicant's reply has overcome the following rejection(s):  
Obviousness-type double patenting; 112 2nd
4. ☐ Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5. ☒ The a) ☐ affidavit, b) ☐ exhibit, or c) ☒ request for reconsideration has been considered but does NOT place the application in condition for allowance because:  
See attachment
6. ☐ The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7. ☒ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
- The status of the claim(s) is (or will be) as follows:
- Claim(s) allowed: none
- Claim(s) objected to: none
- Claim(s) rejected: 17-36 and 38-49
- Claim(s) withdrawn from consideration: \_\_\_\_\_
8. ☐ The proposed drawing correction filed on \_\_\_\_\_ is a) ☐ approved or b) ☐ disapproved by the Examiner.
9. ☐ Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_
10. ☒ Other: See attached PTO-892.

### **DETAILED ACTION**

The terminal disclaimer filed on March 7, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6,159,477 has been reviewed and is accepted. The terminal disclaimer has been recorded.

The obviousness-type double patenting rejection of claims 17-36 and 38-49 is withdrawn in view of the terminal disclaimer.

The 112, 2nd rejection of claims 18 and 40 is withdrawn in view of the claim amendments.

The 103 rejections of claims 17-36 and 38-49 are maintained for reasons of record.

Applicant argues that herpesviruses and poxviruses are nonanalogous, since an interference decided in 1988 (involving applications filed in 1981) came to a conclusion that herpesviruses and poxviruses were patentably distinct. However, the art has advanced since that date, and it is maintained that both herpesviruses and poxviruses were considered as analogous vaccine vectors at later dates, such as the effective filing date for this application. For a few examples providing evidence of recognition of analogy between poxviruses and herpesviruses by those in the vaccine vector art, the following publications are cited: Esposito et al included herpesviruses as well as poxviruses in a 1989 review of "Infectious Recombinant Vectored Virus Vaccines", and a review by Tartaglia et al in 1990 included a discussion of adenovirus and herpesvirus vectors in a review entitled "Poxvirus-Based Vectors as Vaccine Candidates."

Applicant also points to the proposition that there must be some prior art teaching which would have provided the necessary incentive or motivation for modifying the reference teachings.

Art Unit: 1648

As discussed previously, Haanes specifically discusses recombinants designed to target specific pathogens, but does not discuss which particular gene to use to target those pathogens. Therefore the teachings of Haanes provide an incentive to seek an appropriate gene to use for vaccination against a targeted pathogen. Each secondary reference remedies the deficiency of Haanes by suggesting an appropriate gene or gene product for use in a vaccine against a pathogen discussed in Haanes.

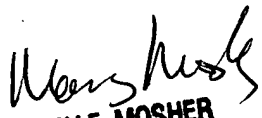

For these reasons, applicant's arguments are seen as unconvincing, and the rejections are maintained.
